

IMI2 JU responses to the Independent Observers' Report

Call ID: H2020-JTI-IMI2-2017-13-two-stage

IMI2 13th Call for Proposals

Stage 2 evaluation

Date of evaluation: 25-28 September 2018

Name of the observers: Dr Martin Reddington and Professor William Robertson

IMI2 JU responses to the report

IMI2 JU acknowledges the independent observers' remarks that the IMI2 JU scheme is novel, imaginative, timely and well served by a dedicated highly professional staff.

IMI2 JU is happy to analyse the recommendations received and the thoughts on running the panel. As the independent observers indicated, IMI2 JU already implemented some of the recommendations made after stage one evaluation. The same approach will be taken regarding stage two evaluation.

IMI2 JU would like to thank the independent observers for their observations in the choice of the rapporteurs, their thoughts on running the panel and the panel meeting. Many of the observations made are already part of the IMI2 JU processes. For those more novel aspects IMI2 JU staff are happy to analyse these and, whenever possible, to implement them to ensure that the process is as efficient as possible.

As a general remark, IMI2 JU will continue the efforts in making sure that the same approach will be used in all evaluation panels.
