

IMI consultation on advanced therapies

Response from Peter Dubruel

Dear,

I am sending this reply on the IMI consultation on my personal behalf.

I have read the document with great interest. One of the points addressed in the document is the field of cell/tissue engineering.

In my function of Liaison Officer to Industry within the Board of the European Society for Biomaterials, I would be more than happy to discuss with you and your team what possible initiatives could be launched in this exciting field.

In my personal opinion different subdisciplines (cells, materials, production methods of the latter two, ...) could be merged in a challenging project with relevance for industry (large, medium and small companies), society as well as academia.

Kindest regards and looking forward to your reply at your earliest convenience,

Peter Dubruel
