

IMI and patient involvement in research – the story so far

Elli Karagianni, Scientific Project Officer, IMI
IMI Impact Series – Patient Involvement | 07/10/2021

Key figure: As of end 2020 almost 60% of all IMI projects have patient organisations, either as partners in the consortium, represented on advisory boards, or as consultants for topics of relevance.

Advancing the field of patient involvement in R&D

Useful resources from IMI projects

A wealth of educational resources designed specifically for patients who want to get involved in research. Find out more on : www.eupati.eu

A comprehensive toolbox that brings together recommendations, tools and relevant background information to make patient engagement in medicines development easier for all. Find out more on : www.imi-paradigm.eu

Methodologies and recommendations on how to best include patient perspectives during the development, approval and post approval of new therapies. For more information visit: www.imi-prefer.eu
