Consortium agreement, Grant agreement, implementation and reporting

What does the typical IMI project look like?

Industrial partners align themselves around a real challenge for industry and agree to work together and commit resources

New ideas from public sector, universities, SMEs etc. are needed to address the challenge

Scale is a key to success and is provided by IMI funding and the outcomes should be transformative for the industry as well as having a clear “public” value

A typical IMI consortium

An international, cross-sector community

 - In-kind/cash contribution from BNRFs (**b**eneficiaries **not** receiving funding):
 - EFPIA constituents and affiliates

Other legal entities may also participate as BNRFs at their own cost

One single funding rate per project - BRFs

One project = One rate

For all beneficiaries and all activities

- 100% of the direct eligible costs
- Indirect costs: **25% flat rate**

JU contribution to BRFs covers:

Background vs. Results

Background vs. Results

Background

- Any data, know-how or information — whatever its form or nature (tangible or intangible), including any rights such as intellectual property rights — that:
 - is held by the beneficiaries **before** they acceded to the Agreement,
 - is **needed** to implement the action or exploit the results, and
 - *which is **identified and agreed** by the Beneficiaries.*

All conditions have to be met to be considered background and be subject to specific rights & obligations

Results

- Any (tangible or intangible) output of the action such as data, knowledge or information — whatever its form or nature, whether it can be protected or not
 - that is generated **in the action**, as well as any rights attached to it, including intellectual property rights
 - **excluded Sideground** - output generated by a beneficiary under the action but **outside of the action objectives** as defined in the Grant Agreement
- => Importance of Action objectives**

Ownership of results

Results are owned by the beneficiary that generates them

- Possible transfer of ownership
- within the consortium to affiliates and purchasers without prior notification
 - on case-by-case basis

Research Use vs. Direct Exploitation

- **Research Use**

- Use of results or background necessary to use the results for all purposes other than for completing the action or for direct exploitation

Based on previous experience

- **Direct exploitation**

- to develop for commercialisation or to commercialise the results

Access Rights conditions

Access rights granted by a beneficiary to/on	Background (necessary and identified)	Results	Sideground
Beneficiaries for completion of the action	Royalty-free	Royalty-free	N.A.
Beneficiaries and affiliates for Research Use	Fair & reasonable conditions (e.g. Royalty-free conditions)	Fair & reasonable conditions (e.g. Royalty-free conditions)	N.A.
Third Parties for Research Use after the action	Appropriate conditions	Appropriate conditions	N.A.
Beneficiaries and affiliates or Third Parties for Direct Exploitation	To be negotiated	To be negotiated	N.A.

Access rights and third parties

- Only after the end of the action for research use purposes
- Time-limits to be agreed
- Possibility to exclude specific elements of background (only for existing background) under **exceptional circumstances** and after a **reasoned request**

Based on IMI1 experience

Open Access in IMI2 Projects

Open Access to Publications

(Article 29.2 GA)

Deposit in repositories and publishing in Open Access (OA) both encouraged.

Processing charges can be considered eligible costs but:

- Must be budgeted before project start
- Publications must be placed in repository
- Provision of OA is a requirement

Open Research Data (ORDP)

(Article 29.3 GA)

From Call 11, all IMI2 projects are automatically part of the ORDP.

The ORDP covers 'underlying data' generated in the project, but can be extended to other types of data.

The ORD balances openness with protection of scientific information, commercialisation and IPR and embraces a flexible approach; allowing projects varying degrees of engagement with the ORDP.

Data Management Plan (DMP)

(AWP)

All projects need to:

- Develop and update a DMP*.
- Deposit their data.

DMPs should aim to produce 'FAIR' data:

Findable
Accessible
Interoperable
Re-usable

Note: All IMI Projects are required to provide a Data Management Plan (DMP) regardless of the project's engagement with the ORDP.

NEW Legal entity validated in parallel

IMI2 Grant Agreement

- The new IMI2 JU MGA (v.5) will apply to Call 17
- It follows H2020 Model Grant Agreement (v.5) with IMI2 specificities.
- IMI2 JU Annotated Model Grant Agreement v.2 (based upon H2020 AGA v5, while H2020 AGA v.5.1 already published)
- It is e-signed between IMI2 JU and Coordinator only. Other beneficiaries e-sign Accession Forms
- EFPIA and Associated Partners are beneficiaries not receiving funding (BNRFs, Art.9) - their financial report occurs outside the GA, for more info please consult '*IMI2 JU guidelines for reporting in kind and financial contributions by Members other than the Union and Associated Partners*'

IMI2 Grant Agreement

Article 41.3 - Consortium agreement *may cover*:

- *internal organisation of the consortium, including allocation of scientific tasks among beneficiaries*

Scientific Project Leadership

Scientific Project Leader may be different from Coordinator to:

- reflect the spirit of industrial co-leadership in call topics built upon EFPIA/industry scientific priorities
- address the need for strong scientific coordination and collaboration between BRFs (JU funded) and BNRFs (industry)

IMI2 specificities are presented in the IMI2 JU AGA

Consortium agreement

- Contractual arrangement **between all participants** to set out their rights and obligations, especially governance, liability and IPR
- Shall comply with the **IMI2 JU Model Grant Agreement**
- To be agreed before the signature of the GA, IMI2 JU is not a party
- **To be adapted to the specific needs of each IMI action!**
- A template prepared by EFPIA shows what a consortium agreement might look like:

<http://efpia.eu/documents/229/141/EFPIA-Consortium-Agreement-Template-for-IMI2-actions>

Consortia may also use alternative templates if they wish.

Tips for success

Common Mistakes

- **Admissibility/Eligibility criteria not met:**
 - submission **deadline** missed
 - proposal **out of scope**
(if you have doubts on how to respond to the Call contact us)
 - Not involving at least **three independent legal entities** (RIA) from **three** different **MS/AC**

Common Mistakes

- The proposal does not address all the **objectives** (in some cases proposals have nothing to do with the topic!)
- submitted text does not respect the proposal template (sometimes received even slides!)
- Applicants do not have the **capabilities** to address all of the objectives or there is redundancy between partners
- A proposal is scientifically excellent but will have **limited impact**
- **Budget**, either over-estimated or not fully justified
- **Ethical issues** not addressed

Tips

- Read all the **Call-relevant material** that is provided on the IMI website – www.imi.europa.eu
- **Understand IMI2 JU rules** and respect them
- **Consider the PPP dimension** of the action (e.g. Governance, industry contribution vs IMI2 JU funding)
- **If in doubt, ask** a member of the Programme Office
- Your proposal should provide **reviewers** with all the information requested to allow them to evaluate it
- Start **working early** (pre-materials available before)
- Dedicate sufficient time to submit the proposal: create an EU login account, obtain a PIC number - **don't wait until the last day to start the submission process**
- **More tips:** www.imi.europa.eu/content/tips-applicants
