Zeta Biopharma: a plant construction company in Austria with 237 employees providing process technology for biopharmaceutical applications by supplying global pharmaceutical companies with individually designed plants.

The company is one of only two in Europe to use freeze and thaw containers for storage and transport of substances for the pharmaceutical industry. These liquids can be frozen in a controller storage facility for years and are often sent to markets worldwide.

The working capital loan covers Zeta’s high working capital requirements during the long lead times in plant engineering and manufacturing. It helps the company to implement additional R&D projects and to achieve faster growth.
