

Event: IMI impact on dementia, 15 June 2021

SPEAKER BIO

Gill Farrar

Global Medical Leader
GE Healthcare Medical Affairs

Title of talk: AMYPAD: Imaging pathology in the Alzheimer's Disease brain. What does the future hold?

The AMYPAD project will be presented by Dr Gill Farrar of GE Healthcare, who is the EFPIA co-lead with Professor Frederik Barkhof. Gill has been involved in the R+D of amyloid PET imaging since the early days of the discovery of Pittsburgh compound B which is the gold standard research tracer and was responsible for the clinical studies which led to the approval and registration of the tracer Vizamyil by the FDA in the USA and EMA in Europe. For past few years Gill has been working in the Medical Affairs department as the Global Leader of PET Neurology and has enjoyed working with our academic partners in the AMYPAD consortium which is now entering its 5th year.
